

# CARBON PASTE

## New Formulation

### Mounting paste for carbon and aluminium parts

#### Description

CARBON PASTE is ideal for mounting carbon and aluminium parts such as seat posts, pedals, handlebar stems etc. in the BIKE sector. This paste facilitates the dismantling of locked joints. The tightening torque required for the respective clamping therefore decreases by up to 30 per cent.

#### Field of application

The mounting paste is ideal for carbon and aluminium parts such as seat posts, pedals, handlebar stems etc. The tightening torque required for the respective clamping therefore decreases by up to 30 per cent.

#### Sizes

5g, 100g, 850g

#### Advantages

- Effectively protects against contact corrosion
- Facilitates the dismantling of locked joints
- Reduces the required tightening torque

#### New Formulation

The new formulation has been tested and approved by a renowned technical accessories supplier and original equipment manufacturer

#### Consistency category

NLGI 2
