

CARBON PASTE

Mounting paste for carbon and aluminium parts

Description

CARBON PASTE is a paste that has been specially developed for assembling carbon and aluminium parts.

Product features

- effectively protects against contact corrosion
- facilitates the dismantling of locked joints
- easy to apply thanks to integrated brush
- the paste is transparent

Field of application

The mounting paste is ideal for carbon and aluminium parts such as seat posts, pedals, handlebar stems etc. The tightening torque required for the respective clamping therefore decreases by up to 30 per cent.

Notes

PLEASE NOTE: The carbon parts can be damaged by excessive tightening. MOTOREX CARBON PASTE increases friction so that parts need to be tightened considerably less.
